

ABSTRACT OF THE DISCLOSURE

A foldable hammock includes two bottom frames, and two side frames. Each of the bottom frames includes a fixed tube and two retractable tubes each retractably mounted on the fixed tube. Each of the two side frames
5 includes two connected upright rods, two protruding sockets, and a hanging hook. Thus, the foldable hammock is available for a canopy, a soft bed, a swing chair, a foldable chair or the like, thereby enhancing the versatility of the foldable hammock to facilitate a user operating the foldable hammock.
